- **Skin Contact:** Wash thoroughly after skin contact. The exposed area should be examined by medical personnel if irritation or pain persists after the area has been washed.
- **Eye Contact:** Immediately flush eyes with plenty of water for at least 20 minutes. Get immediate medical attention. Hold eyelids apart periodically while flushing.
- **Inhalation:** Remove from exposure. If not breathing, give artificial respiration and call a physician.
- **Ingestion:** If swallowed, contact physician or poison control center immediately.

4.2 Most important symptoms and effects, both acute and delayed

- **Acute:** Direct contact with the eyes may cause severe irritation. Can cause skin irritation. Harmful if swallowed. Expected to cause gastrointestinal tract irritation with nausea and vomiting.
- **Delayed Effects:** None known.

4.3. Indication of any immediate medical attention and special treatment needed

- **Note to Physician:** No specific indications. Treatment should be based on the judgment of the physician in response to the reactions of the patient.

Air Monitoring Method: Gravimetric analysis for total particulate and respirable fraction (<10 microns).

8.2. Exposure controls
Also see the annex to this SDS (if applicable) for specific exposure scenario controls.

Other Engineering Controls: All operations should be conducted in well-ventilated conditions. Local exhaust ventilation should be provided.

Personal Protective Equipment: Wear chemical safety goggles. Where splashing, misting or contact with eyes is likely, wear a face shield. Wear impervious gloves made of nitrile, neoprene or latex. Where overexposures are a concern, use NIOSH-approved dust/mist respirator as necessary.

Thermal Hazards: Not applicable.

Environmental Exposure Controls: The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
