8.2. Exposure controls

Also see the annex to this SDS (if applicable) for specific exposure scenario controls.

Personal Protective Equipment:

Wear a NIOSH approved respirator if levels above the exposure limits are possible. This material does not have established exposure limits. Wear a positive pressure air supplied respirator in situations where there may be potential for airborne exposure. Follow a respiratory protection program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditions warrant the use of a respirator. Chemical goggles or face shield where necessary, impervious gloves and clothing, boots, NIOSH approved chemical cartridge respirator or supplied air breathing apparatus should be used as necessary. Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available.

Respirator Caution:

Ventilation:

All operations should be conducted in well-ventilated conditions. Local exhaust ventilation should be provided. Use process enclosures to control the level of dust in the air. Local exhaust ventilation or other engineering controls are normally required when handling or using this product to avoid overexposure.

Other Engineering Controls:

All appropriate engineering controls should be used to minimize exposure potential. Use exhaust ventilation to keep airborne concentrations below exposure limits. Facilities storing or using this material should be equipped with an eyewash and safety shower. Rags, steel wool or waste soaked with this product may spontaneously catch fire if improperly discarded. Immediately after use, place rags, steel wool or waste in a sealed water-filled container.

Thermal Hazards:

Not applicable.

Additive or Synergistic Effects:

None known.
